

INDYJet *Complex Aircraft Joins IFT Fleet!*

Indy Flight Training has done it again! 2014 has been a great year for our flight school program. As we continue to grow we want to provide an array of aircraft to our flight school students. Just last month we brought on a new Cessna 172 (N20519) and this month, new to our flight school fleet, a 1988, fully restored, Piper Arrow III (N533PU).

The Piper Arrow can accommodate 4 passengers. With brand new interior, new Lycoming engine and new instrument panel (including Garmin 530GPS), the ride can only be pleasant and comfortable.

Since the aircraft has retractable landing gear, Indy Flight Training can now offer students training towards their commercial certificate. This complex aircraft has it all and we couldn't be more excited to add it to our flight school line-up.

N533PU is the nicest commercial/complex trainer in the Midwest and is ready to fly. Rental rates are \$165 for Club Members and \$185 for Non-Club Members. Visit [Skyscheduler](#) or call 317-335-3371 to schedule your next flight.
